PROFESSIONAL SUMMARY

Senior Flutter Developer with 6+ years building, shipping, and maintaining production iOS and Android applications across enterprise HR, real-estate investment, e-learning, digital media, events, and mobility for products in Egypt, Saudi Arabia, and the UAE. Specialized in BLoC/Cubit state management, Clean Architecture and SOLID design, bilingual Arabic/English (RTL/LTR) products, offline and background media playback, attendance systems using geofencing, QR, and BLE beacons, application security, and performance optimization. Full ownership of App Store and Google Play releases, including store transfers and privacy compliance. Experienced collaborating remotely with distributed product, backend, QA, and design teams.

PROFESSIONAL EXPERIENCE

Senior Flutter Developer — InnovaDigits · Full-time · Jan 2023 – Present · Cairo, Egypt

- Senior member of the Mobile Services Team; progressed into client-facing engagements working directly with external product, backend, QA, and business teams.
- Contribute to mobile architecture decisions, feature planning, technical documentation, code reviews, and production release management.
- Own features across the full lifecycle — requirements, API integration, testing, store deployment — and investigate live production issues to improve performance, stability, and security.
- Support other developers through code reviews, debugging help, and technical guidance.

AppsLink Consulting (UAE) — HCM7, enterprise HR & employee self-service

- Developed and maintained requests, approvals, leave, schedules, payroll-related services, and account workflows on a production enterprise platform.
- Contributed to attendance solutions using geofencing, QR check-in, BLE beacons, and location-aware employee services; improved reliability and enterprise backend integration.

Masheed (Saudi Arabia) — Bsht · Masaken · SaudiProjects QR

- Built **Bsht** real-estate investment workflows: opportunities, reservations, financing plans, company accounts with switching, documents, and notifications.
- Contributed to **Masaken** (properties and investment opportunities) and **SaudiProjects QR** (secure event check-in with QR invitation validation and real-time attendance statistics).
- Implemented bilingual Arabic/English experiences and role-based functionality; handled build configuration, store submissions, transfers, and release compliance.

Flutter Developer — Lamha · Full-time, Remote · Apr 2022 – Dec 2022 · Amman, Jordan

- Audiobooks & podcasts platform: audio playback, downloads, library, content discovery, and accounts; performance and stability work leading into iOS and Android releases.

Flutter Developer — Matrix Clouds · Full-time · Aug 2021 – Mar 2022 · Cairo, Egypt

- Client Flutter applications across multiple domains: REST APIs, Firebase, authentication, notifications, maps, and real-time features; Agile planning, code reviews, testing, and production support.

Junior Flutter Developer — TQNEE · Full-time · Jan 2020 – Jul 2021 · Mansoura, Egypt

- Shipped and maintained production Flutter apps (Kushoof, Makhdoum, Tourz, and others): REST and Firebase integration, debugging, testing, and Play Store releases; several apps remain live years later.

SELECTED PRODUCT CONTRIBUTIONS

- **Elit3 — Founding Mobile Engineer:** media-heavy learning platform (courses, live sessions, podcasts, reels, Quran experience) with background/offline playback, deep linking, security, and an FFmpeg iOS toolchain fix published as a public fork.
- **SAWA — Founding Mobile Engineer, Fusion Technologies · Part-time · Oct 2021 – Present:** carpooling and ride-sharing product developed from its earliest stage: driver/passenger flows, ride creation, search, booking, maps, and messaging; ongoing architecture, feature delivery, production maintenance, and iOS/Android releases alongside my primary full-time role.

- **A-plus — Lead Mobile Contributor:** long-term development and modernization of an existing education platform across multiple App Store and Google Play releases.
- **Cleanz — Creator (open source):** native macOS storage cleaner and analyzer built with SwiftUI — github.com/alzoldik/cleanz.

TECHNICAL SKILLS

Architecture & state: Clean Architecture, Repository Pattern, SOLID, design patterns, dependency injection, modular design · BLoC, Cubit, Provider, RxDart

Data & integration: REST, Dio, JSON, WebSockets, Socket.IO, Firebase, local caching and offline-first flows

Product capabilities: push notifications, deep linking, background audio/video, FFmpeg media pipelines, maps and location, geofencing, BLE beacons, QR scanning, Arabic/English localization (RTL/LTR)

Security & quality: application security, secure storage, performance profiling, crash investigation, code reviews, production monitoring

Delivery: CI/CD (GitHub Actions), App Store Connect, Google Play Console, release management, store transfers, privacy compliance · Xcode toolchain (xcframeworks, CocoaPods)

Native & tools: Swift, SwiftUI, Java, platform channels · Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Trello

EDUCATION & CERTIFICATIONS

BSc Computer Science, Mansoura University, 2016–2020

Meta iOS Development Certificate (2024) · Flutter & Dart: The Complete Guide (Udemy, 2019) · Android Development with Java (2018)

LANGUAGES

Arabic (native) · English (professional working proficiency)
