LinkedIn: [alzoldik](#) | GitHub: [alzoldik](#)

Professional Summary

Senior Flutter Developer with 6+ years of experience building, shipping, and maintaining production-grade mobile applications for iOS and Android across enterprise HR, real estate, investment, event operations, e-learning, digital content, and mobility.

Experienced in scalable mobile architecture, application security, performance optimization, offline-first functionality, media-heavy applications, API integration, and production release management. Proven ability to own mobile workstreams, collaborate directly with clients and cross-functional teams, review code, support developers, and deliver stable applications from initial development through production maintenance.

Professional Experience

Senior Flutter Developer | InnovaDigits | Full-time
January 2023 – Present | Egypt

- Started within the Mobile Services Team as a senior mobile team member, contributing to the development and maintenance of Flutter applications across multiple company projects.
- Progressed into client-facing outsourcing engagements, working directly with external product, backend, QA, and business teams.
- Contributed to mobile architecture decisions, feature planning, technical documentation, code reviews, and production release management.
- Owned assigned features throughout the complete delivery lifecycle, from requirement analysis and API integration to testing and store deployment.
- Investigated production issues, improved application performance and stability, and supported regular iOS and Android releases.

- Maintained reusable components, structured state management, coding standards, and scalable development practices.
- Supported other developers through technical guidance, code reviews, debugging, and knowledge sharing.

Selected Client Engagements

AppsLink Consulting, UAE — [HCM7](#)

- Worked as a Senior Mobile Engineer on HCM7, an enterprise HR and employee self-service platform.
- Developed and maintained employee requests, approvals, attendance, leave, schedules, notifications, payroll-related services, and account-management workflows.
- Contributed to attendance solutions involving geofencing, QR-based check-in, beacons, and location-aware employee services.
- Improved application reliability, performance, security, and integration with enterprise backend systems.
- Supported production releases, issue investigation, technical documentation, and coordination with product, backend, and QA teams.

Masheed, Saudi Arabia — [Masaken](#) | [Bsht](#) | [SaudiProjects QR](#)

- Worked across a portfolio of real estate investment and event-management products.
- Contributed to Masaken, a real estate platform for viewing properties, projects, and investment opportunities.
- Developed and maintained Bsht workflows covering investment opportunities, real estate assets, reservations, requests, company accounts, documents, notifications, and profile management.
- Contributed to SaudiProjects QR, an event operations application used for invitation validation, QR-based check-in, and attendance verification.
- Implemented bilingual Arabic and English experiences, complex API integrations, role-based functionality, and company-account switching.
- Supported iOS and Android build configuration, store submissions, application transfers, production troubleshooting, and release preparation.

Flutter Developer | Lamha | Full-time

April 2022 – December 2022 | Amman, Jordan — Remote

- Contributed to [Lamha – Audiobooks & Podcasts](#), a digital content platform combining audiobook summaries, podcasts, readable content, and audio experiences.
- Developed and enhanced functionality across content discovery, library management, reading, listening, downloads, and account flows.

- Collaborated with UI/UX designers, backend developers, and business stakeholders to refine product requirements and improve usability.
 - Improved application performance, API integration, reusable components, and application stability.
 - Supported quality assurance, issue resolution, and iOS and Android release preparation.
-

Flutter Developer

Matrix Clouds | Full-time

August 2021 – March 2022 | Cairo, Egypt

- Developed and maintained cross-platform Flutter applications for iOS and Android.
 - Integrated REST APIs, Firebase services, authentication, notifications, maps, and real-time functionality.
 - Implemented responsive interfaces and reusable components based on product and UI/UX requirements.
 - Participated in Agile planning, code reviews, testing, production support, and application releases.
 - Diagnosed technical issues and improved application maintainability, performance, and stability.
-

Junior Flutter Developer

TQNEE | Full-time

January 2020 – July 2021 | Mansoura, Egypt

- Built and maintained mobile application features using Flutter and Dart.
 - Integrated REST APIs, Firebase services, authentication, notifications, and local storage.
 - Converted UI/UX designs into responsive and reusable Flutter interfaces.
 - Assisted with debugging, testing, Play Store releases, and application updates.
 - Developed a strong foundation in object-oriented programming, state management, Git workflows, and mobile development practices.
-

Selected Product Contributions

[Elit3](#) — Founding Mobile Engineer

- Built the Flutter application from the ground up as part of a small product team.

- Developed a production e-learning platform covering courses, structured lessons, progress tracking, live sessions, notifications, community features, PDF content, and secure video and audio playback.
- Implemented offline functionality, deep linking, background playback, application security, performance monitoring, and production debugging tools.
- Continue to contribute to architecture, security, performance, user experience, and production releases.

[SAWA](#) — Founding Mobile Engineer

- Built and evolved a carpooling mobile product connecting drivers and passengers.
- Contributed to ride creation and discovery, booking flows, maps, location services, user verification, messaging, notifications, and ride management.
- Supported the product across initial development, publishing, feature expansion, production maintenance, and ongoing improvements.

[A-plus](#) — Lead Mobile Contributor

- Led the long-term modernization and maintenance of an existing educational application.
- Enhanced application architecture, user experience, video and audio playback, iPad compatibility, performance, and release stability.
- Delivered new functionality and maintained the application across multiple production releases.

[Neo Nerd](#) — Founding Mobile Engineer

- Built an e-learning mobile application as part of a small product team.
- Contributed to course discovery, structured educational content, video-based learning, account management, and student progress experiences.
- Supported application architecture, production publishing, maintenance, and ongoing product improvements.

Technical Skills

Languages: Dart, Java, Swift

Mobile Development: Flutter, Android and iOS platform integration, responsive and adaptive UI

Architecture: Clean Architecture, Repository Pattern, SOLID Principles, OOP, Design Patterns, Dependency Injection, modular architecture

State Management: BLoC, Cubit, Provider

Networking and Data: REST APIs, Dio, JSON, WebSockets, Socket.IO, Firebase, Hive, local caching, secure storage

Mobile Capabilities: Push notifications, deep linking, background services, video and audio playback, maps, location services, file handling, offline-first functionality

Quality and Security: Performance profiling, debugging, crash investigation, application security, code reviews, production monitoring

Delivery: CI/CD, App Store Connect, Google Play Console, iOS and Android release management

Tools and Collaboration: Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Trello, Android Studio, VS Code, Xcode, IntelliJ IDEA

Education

Bachelor of Science in Computer Science

Mansoura University
2016 – 2020

Certifications

- Meta iOS Development Certificate — Meta, 2024
 - Flutter & Dart: The Complete Guide — Udemy, 2019
 - Android Development with Java — Mansoura University, 2018
-

Languages

- Arabic — Native
- English — Professional Working Proficiency
